

"COTTON TALES"

BY JFAS

DIY Floral Kit: Step-by-step Guide

Prepare your flowers!

Undo the bundle of wheat tied with the brown twine string.

Insert the wheat stalks at the top center of the foam as pictured.

Insert the rabbit
tails at the top left
of the foam as
pictured.

Insert the cotton
bolls (yes, that's
spelled correctly!)
as pictured.

Fill the remaining spaces in the arrangement with the remaining cotton bolls.

Remember to vary the height of the stalks accordingly.

Accentuate your arrangement with the Caspia and Setaria flowers as pictured.

As a general guide, the long Caspias add form and width while the Setaria act as fillers/color additions to your arrangement. Feel free to explore!

Almost there!

Insert the remaining wheat stalks (bound with green wire) horizontally under the cotton bolls as pictured.

The wire should sink into the foam in order to secure it.

Finally, arrange the coco fibers loosely behind the wheat stalks as pictured to complete your arrangement.

And you're done! Congratulations!
